### Course Objectives

Cataract surgery is moving at a very rapid pace and it is in this context that we will provide a scientifically based and fact filled overview of those technologies and techniques that will contribute to positive patient outcomes today and in the future.

This event will feature an opportunity to interact with a world class faculty of ophthalmic surgeons and researchers, as well as colleagues from other parts of Latin America.

### Main Topics

- Presbyopia-correcting IOLs
- Toric and Phakic IOLs
- Aspheric IOL Technology
- Torsional Ultrasound
- Micro-Coaxial Cataract Surgery
- Ophthalmic Viscosurgical Devices
- Clinical Trial Data and Clinical Experience
- Enhancing Phaco Procedure Outcomes
